\* Guidelines for **Roll-Formed Louver** Structure; Rafter spacing 5' or less (Pricing Considers 24" Louver Overhang on Each End)

\* Guidelines for **Extruded Louver** Structure; Rafter spacing 7' or less (Pricing Considers 24" Louver Overhang on Each End)

3.4 louvers per foot

\* **Roll-Formed Louvers** (0-7' louver = 2 rafters), (8'-12' louvers = 3 rafters), (13'-17' louvers = 4 rafters), (18' - 23' louvers = 5 rafters)

\* **Extruded Louvers** (0-7' louver = 2 rafters), (8'-12' louvers = 2 rafters), (13'-17' louvers = 3 rafters), (18' - 23' louvers = 4 rafters)

In a 10lb load area, rafters can overhang 30% of the previous span up to 36" other load areas are less. Depending on the rafter spacing, rafters can span up to 13' in a 10lb live load / up to 10' in 20lb / and up to 9' in a 30lb load / up to 7' in a 40lb load between support beams

A mechanism (manual or motorized) is required every 20' of rafter or 19' louvers up to 300 square feet

\* The content of this document is only a recommendation. You should not rely on this recommendation for installation purposes, you must follow the engineering package and your local building codes requirements for all installations
